DAGEM WOLDEYOHANNES

COMPUTER SCIENCE GRADUATE | CODING AND AI EVALUATION

Seattle, Washington • dagem.alemseged1@gmail.com

PROGRAMMING

- Python
- C++
- JavaScript
- C
- Java

CORE SKILLS

- Logical reasoning
- Algorithmic problem solving
- Code comprehension
- Debugging and testing
- Attention to detail
- Clear written communication

AREAS OF INTEREST

- AI model evaluation
- Code quality and correctness
- Programming logic
- Technical response review

LANGUAGE

English

Fluent

PROFESSIONAL PROFILE

Computer Science graduate from Augustana University with programming experience in Python, C++, JavaScript, C, and Java. Interested in AI evaluation and coding tasks, including checking technical responses for correctness, identifying logic errors, and explaining findings clearly. Fluent in English and comfortable approaching programming problems systematically.

EDUCATION

Augustana University

Bachelor's Degree in Computer Science

2026

ACADEMIC PROJECTS

Student Records Management System

Developed a program for adding, searching, updating, and displaying student records. Applied structured programming, input validation, and error handling to support reliable operation.

Python Data Processing and Analysis

Created a script to process structured data and produce organized summaries using loops, conditional logic, and functions. Checked program outputs and corrected issues to improve accuracy.

Algorithm Implementation and Testing

Implemented and tested common searching and sorting algorithms. Examined results across varied inputs and edge cases, practicing debugging and evaluating solution correctness.
